

Dr Pierre Coulon

Dr Coulon has an extensive 15 years experience as an ophthalmologist in France and has , other the world , performed over 12 000 ophthalmic successful surgeries (Cataract & Refractive surgery). He has devoted himself to the practice of state of the art oculo-plastics (Fellow Ship in Eyelid Surgery ,Limoges 1994) and aesthetic rejuvenation procedures such as lid surgeries, rejuvenation techniques by fillers and Botulinum Toxin injections and laser treatments. During the last 10 years, he was a frequent lecturer in Ophthalmology (Alcon: Neosonix, Ozil US Technique, Infinity Phaco, Restor multifocal intra-ocular lens), and attends all most renowned European Oculo-plastics/Aesthetic conventions and training seminars which allows him to remain on the forefront of latest technology usage.

While being Bordeaux's University Chief Resident of Ophthalmology in 1991, where he participated in the training of renown South East Asian ophthalmologists, he made his first trip to SEA on a humanitarian mission (1992) and has been going back ever since. He successfully led 11 SEA humanitarian missions. In 2006, as demand in south East Asia changed he was asked to share his skills in the oculo-plastic field to the benefit of his patients.

Oculo plastic skills

Aesthetic superior and inferior eyelid surgery (Blepharoplasty)

eyelid surgery can treat:

- Loose or sagging skin that creates folds or hides the natural contour of the upper eyelid
- Excess skin that hangs down from the upper eyelid, sometimes impairing vision
- Excess fatty deposits that appear as puffiness in the upper eyelids
- Bags under the eyes
- Droopiness of the lower eyelids, showing white below the iris (scleral show)
- Excess skin and fine wrinkles of the lower eyelid

- Ptosis
- Ectropion, Entropion
- Canthoplasty

Botulinum Toxin injection expert

The cosmetic form of botulinum toxin, often referred to by its product name **BOTOX®**, is a popular non-surgical injection that temporarily reduces or eliminates frown lines, forehead creases, crows feet near the eyes and thick bands in the neck

Aesthetic Use:

- forehead, frown lines, crow's feet, eyebrow lift, neck lift, jaw contouring, bunny lines, gingival smile.

Medical use:

- blepharospasm, facial hemispasm, hyper hydrosis, bruxism

Injectable fillers expert

Injectable fillers such as Hyaluronic acid can plump thin lips, enhance shallow contours, soften facial creases and wrinkles, or improve the appearance of recessed scars.

Aesthetic Use:

- Nose reshaping
- Naso-labial folds
- Lips contouring, volume
- Post dental/implant recontouring
- Jaw contouring
- Hands rejuvenation
- Correction of marionette's lines (sad lines)
- High cheeks
- Tear Trough
